

IO1410 Maintenance Process Specialist CIE-313

General information

Job category	Standard
Status	Published
Department	DIP/Directorate for Plant System Engineering
Division	PSE/Plant Engineering Division
Section	PSE/ PED/ Maintenance & Remote Handling Section

Job description

Main job	Engineering - Mechanics
Title of the position	Maintenance Process Specialist CIE-313
Job family	Coordinating Technician
Grade	G5
Direct employment	Required
Purpose	<p>To implement the ITER machine and plant maintenance policy and maintenance plan;</p> <p>To implement the principles and basic architecture of processes, procedures and related applicable documents for the maintenance of the structures, systems and components (SSC's) of the ITER nuclear facility.</p>
Main duties / Responsibilities	<p>Develops the workflow of maintenance process management documentation;</p> <p>Compiles SSC's maintenance procedures and maintenance records associated with each SSC in collaboration with the SSC's Responsible Officers;</p> <p>Supports the activities of the ITER Maintenance Working Group (MWG);</p> <p>Maintains and keeps up-to-date the ITER Maintenance Directory Software Tool;</p> <p>Guides the SSC's designers in the execution of their systems' maintenance compatibility and maintenance process integration assessment;</p> <p>Maintains and implements the use of the ITER Remote Handling Code of Practice;</p> <p>Maintains the ITER Document Management (IDM) web folder concerning the Maintenance & Remote Handling WBS 2.3;</p> <p>In collaboration with Quality Assurance Division, establishes a maintenance process control system compatible with the Project guidelines and with the requirements of the safety authorities;</p> <p>Maintains the Maintenance and Remote Handling Section technical website (SharePoint);</p> <p>Performs other duties in support of the project schedule as described in the Detailed Work Schedule and the Strategic Management Plan;</p> <p>Performs other duties linked to the above purpose upon management request, as necessary;</p> <p>Maintains a strong commitment to the implementation and perpetuation of the ITER Safety Program, values and ethics.</p>
Measures of effectiveness	<p>Reports to Maintenance and Remote Handling Section Leader;</p> <p>Acts as an interface between with all other ITER Directorates and Departments, responsible for the different SSC's;</p> <p>In response to requests from the Director-General and/or Plant System Engineering (PSE) Directorate Director, or proactively, informs the DG/ PSE Directorate Director of any important and urgent issues that cannot be handled by the concerned line management and may jeopardize the achievement of the Project's objectives.</p> <p>Effectively develops the workflow of maintenance process management documentation within the defined time frame;</p> <p>Accurately compiles SSC maintenance procedures and maintenance records associated with each SSC, in collaboration with the SSC Responsible Officers;</p> <p>Maintains and keeps up-to-date the ITER Maintenance Directory;</p> <p>Provides relevant and appropriate guidance to SSC's designers in the execution of their systems' maintenance compatibility and maintenance process integration assessment;</p> <p>Maintains and implements the use of the ITER Remote Handling Code of Practice.</p>
	<p>SAP id 50001014</p> <p>Project Construction Phase</p>

Applicant criteria

Level of study	At least Bachelor's degree or equivalent
Diploma	Mechanical, System or Nuclear Process Engineering
Level of experience	At least 7 years
Technical experience	At least 7 years' experience in the field of maintenance of large (science or industry) projects; Experience with nuclear regulatory requirements applying to the maintenance of nuclear installations is required; Technical experience in the field of nuclear processes and technology is required; Very good experience in maintaining technical documents and procedures is required. Knowledge of the maintenance process requirements and maintenance process management for at least three of the following systems: mechanical systems, cooling water systems, cryogenic systems, magnets & power distribution (resistive and superconducting magnets, etc.), civil structures.
Social skills	Ability to work effectively in a multi-cultural environment , Ability to work in a team and to promote team spirit
Languages	English (Working)
Specific skills	CATIA, ENOVIA, MS Office standard (Word, Excel, PowerPoint, Outlook)
Others	Knowledge of process flow management tools is required; Knowledge and use of project lifecycle management tools (e.g. CATIA, ENOVIA).
